**Stormwater Authority of the city of Chester Starts Street Sweeping Service during Summer 2021**

*SAC crews will clean designated streets in Chester twice a week through Fall 2021. Residents are asked to look for street signage detailing parking restrictions.*

**Chester, Pa.** — [The Stormwater Authority of the City of Chester \(SAC\)](#) is pleased to announce it has started weekly street sweeping services this summer and will continue through the end of Fall 2021. Residents can expect to see SAC personnel tending to street cleaning efforts on Mondays and Thursdays from 8:00 a.m. until 2:00 p.m.

Recently, SAC purchased a heavy-duty vehicle known as the Tornado A7 Vacuum Sweeper specifically designed to clean city streets. Crews will use this vehicle and other SAC trucks to clean streets and collect trash in the designated areas.

Detailed street signage announcing parking restrictions will be posted in advance. Members of the community who reside on streets where street sweeping services are scheduled to take place will be asked to move their vehicles during the designated hours. During these hours, vehicles that are not moved may be subject to towing and other fines.

Residents are also encouraged to follow SAC on Facebook or visit their website for updates about the street sweeping schedule.

**About Stormwater Authority of the City of Chester**

The Stormwater Authority of the city of Chester (SAC) was established in 2016 by the city of Chester to plan, finance, build, operate and maintain capital in green Stormwater infrastructure within Chester. SAC is committed to creating a long-term 30-year operation and maintenance program that will; revitalize the community and create low barrier to entry-level jobs and economic impact opportunities; provide public education and outreach opportunities around water quality and more sustainable development and preservation; increase property values and promote development opportunities in key community corridors through the repair, rehab, and retrofit of existing outdated infrastructure; and create value through collaboration and crosstalk amongst public and private sector entities that result in aligned goals and interest to benefit the city of Chester.
